

## Thank you!

The first season of collecting GPS-referenced yield data is complete. The PPSN would like to thank all the growers who agreed to participate in our first year of data collection. Data collection will resume this fall.

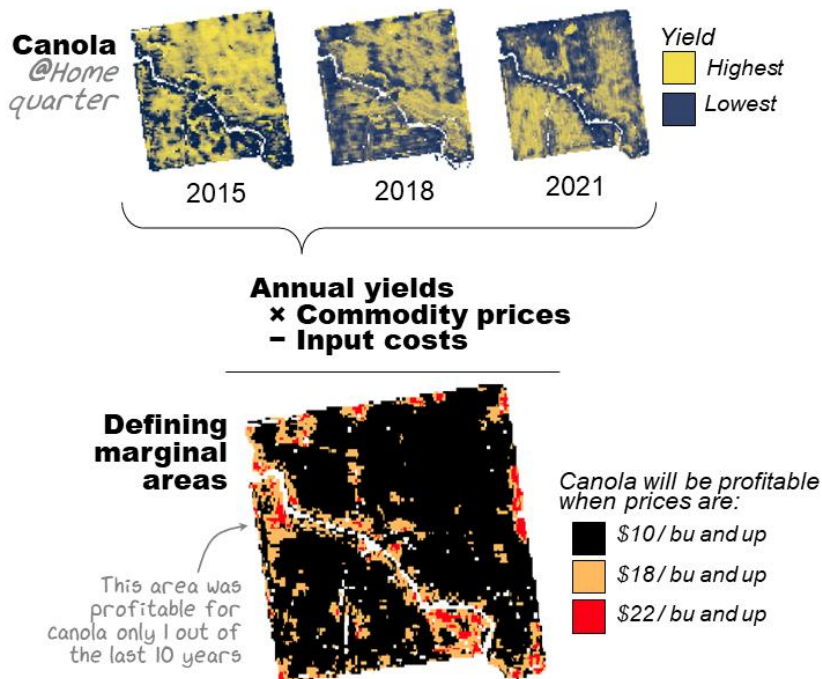

The data collected includes:

- 60 farms representing 670,000 acres between SK and AB.
- Farms ranging in size from 900 to 45,000 acres.
- Yield data from 1 to 15 years.

### Our PPSN network of 60 grower-cooperators

## How does our analysis work?

WE ARE LOOKING FOR MORE
