

Thank you!

The first season of collecting GPS-referenced yield data is complete. The PPSN would like to thank all the growers who agreed to participate in our first year of data collection. Data collection will resume this fall.

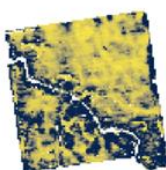

The data collected includes:

- 60 farms representing 670,000 acres between SK and AB.
- Farms ranging in size from 900 to 45,000 acres.
- Yield data from 1 to 15 years.

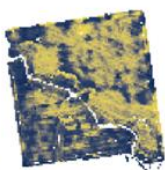

Our PPSN network of 60 grower-cooperators

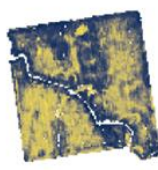

Canola

Annual yields
× Commodity prices
– Input costs

Defining
marginal
areas

This area was
profitable for
canola only 1 out of
the last 10 years

Canola will be profitable
when prices are:

- \$10/bu and up
- \$18/bu and up
- \$22/bu and up

WE ARE LOOKING FOR MORE
PARTICIPANTS!
